

SCENIC SUPPLIES AND EFFECTS

[A] Flexcoat

A flexible, non-toxic, water-based coating for polyurethane and polystyrene foam. Its 100% acrylic formulation provides excellent adhesion to a wide variety of substrates. Contains no plasticizers, so it will not become brittle with age or exterior exposure. Compatible with all Rosco paints used either as tints or surface coatings.

Weatherproof and fire retardant, providing one coat protection for all theatrical applications. Coverage varies with thickness of application, approximately 250-300 square feet per gallon.

gallon	150071200128	\$ 53.75
5 gallon	150071200640	241.75

[B] CrystalGel

A non-toxic, water-based material which provides a clear, plastic-like coating on virtually any surface used in modern stagecraft. It air dries quickly – usually within hours – to a flexible, translucent surface.

When dry, it can be painted with any Rosco scenic paint, carved or safely rolled without cracking, peeling, or sticking. Such products as sand, sawdust or powdered clay can be added to it to create unique textures. Coverage varies with thickness of application, approximately 250 square feet per gallon.

5 gallon	150074000640	241.75

SCULPTURAL ARTS

Sculpt or Coat®

Ideal for scenery, costumes, props, puppets, sculpture, arts and crafts. It can be used for foam coating, texturing, as an adhesive, binder or glaze.

IDDINGS DEEP COLORS

ROSCO

Made with a casein binder, Iddings has the most matte, non-reflective finish, ideal when bright lights are shining on the set. It adheres well to porous surfaces yet remains flexible. Plus, you can re-wet it to work with it. However, because of this feature, the colors can run. Iddings does not adhere well to non-porous surfaces and, once opened, has a shortened shelf life.

SUPERSATURATED PAINT

ROSCO

Supersaturated paint has a vinyl acrylic binder. Since Supersat should be thinned before using each time, it is very economical. It applies well to most surfaces, porous and nonporous.

OFF BROADWAY PAINT

ROSCO

Similar to Supersaturated, in that it is made with a vinyl acrylic binder, Off-Broadway (OB) also has great adhesion to many surfaces. OB remains flexible, which makes it ideal for painting drops, and can be used as a glaze. It is designed to be used full-strength, but may be diluted, if desired.

PREMIERE CLEAR

ROSCO

Premiere Clear **NEW**

Water-borne urethane coating suitable for sealing and protecting painted finishes, floors and high-traffic surfaces. When cured, this clear finish provides long-lasting durability, hardness and abrasion resistance in an environmentally safe, VOC-compliant coating. Virtually odorless and may be thinned with water. Also excellent for use in faux finish or glazing applications. Available in flat, satin or gloss.

Gallon	150068X00128	\$ 54.75
Quart	150068X00032	18.00

QUICK TIP

CHOOSE THE BEST PAINT FOR YOUR SURFACE.

While wood and fabric can accept any Rosco paint, for metal surfaces, Supersat and Off Broadway (OB) have the best adhesion. Where a metal surface has been primed with Tough Prime, Iddings can also be used. For plastics, Supersat has the best adhesion. If using OB, we suggest that you do a test of the plastic surface first.

If you have an unusual surface or question, give us a call or e-mail at product@vls.com. We're pleased to help you find a solution.

SPOTLIGHTON...

ROSCO PROJECTION SCREEN

Projecting images onto a screen is affordable and flexible. Here are some helpful hints in choosing the right screen. The following screens are available as raw materials, 55" seamless, 86" seamless, 110" welded or finished to your specifications. Due to the custom applications, please contact our product department for samples, additional information or pricing.

Black is used in situations with high quantities of ambient light. Images have fine detail resolution when back lit.

Grey features wide viewing angles in rear projection.

Twin White offers a front or rear projection surface, with no apparent difference in picture brightness. Also features wide viewing angles.

Front White is a highly opaque, reflective material, specifically geared for front projection.

Light Translucent features high, direct light transmission, sharp picture quality and minimal absorption loss. Commonly used in studios and stages where there may be a high level of ambient light to reduce the image contrast.
