

DIMMING AND DISTRIBUTION

DIMMERS REPRESENT THE "HEART" OF THE SYSTEM, CONTROLLING THE INTENSITY OF STAGE LIGHTING. THEY ARE AVAILABLE IN STANDARD PACK CONFIGURATIONS OR IN RACK FORM AS PART OF A LARGER LIGHTING CONTROL SYSTEM. DISTRIBUTION EQUIPMENT PROVIDES AN ELECTRICAL OUTLET FOR PORTABLE LIGHTING FIXTURES AND OTHER DEVICES. BOXES CAN BE SURFACE MOUNTED, RECESSED OR PIPE MOUNTED. **SOME PORTABLE PACKS AND RACKS REQUIRE A POWER FEED. REFER TO PAGES 7-8 FOR CONNECTORS AVAILABLE AT ADDITIONAL COST.**

1800W Dimmer DMX	LDT18K	321.45

Compact, portable dimmer provides convenient, reliable control indoors or outside. Rugged NEMA 3R rubber enclosure is weatherproof and shock resistant. Full digital controls for setup and local manual dimming operation. Remote control of dimmer and relay functions using DMX512. Power fail memory retains dimmer level, operating mode and DMX512 address. Convection cooled and filtered for quiet operation. Available with Edison or stage pin extension.

SPOTLIGHTON...

STRAND LIGHTING'S LIGHT RACK

Strand Lighting's new Light Rack is flexible, silent, compact and light weight. Modules are interchangeable between 120 volt and 208 volt power switching for moving lights or quiet 800ms IGBT dimming for static fixtures. You can mix and match to meet the needs of any show. Its size and silence makes it ideal for working in the wings, and the small footprint also makes the Light Rack stingy on truck space.

Contact us for more information, data sheets and pricing.
