

# LIGHTING FIXTURES

ELLIPSOIDS ARE PRIMARILY USED FOR LONGER THROW APPLICATIONS WHERE LIGHT SPILL NEEDS TO BE CONTROLLED. FRESNELS AND PARS ARE COMMONLY USED OVER THE STAGE. FOLLOWSPOTS CAN BE USED TO LIGHT A CONSTANTLY MOVING INDIVIDUAL OR OBJECT, WHILE CYC LIGHTS PROVIDE AN EVEN FIELD OF LIGHT ACROSS A LARGER AREA OR BACKDROP. MOST FIXTURES LISTED HERE COME WITH BARE LEADS. PLEASE REFER TO PAGES 7-11 FOR CONNECTORS AND LAMPS AT ADDITIONAL CHARGE.

## COMPLETE LIGHTING SYSTEMS

PRODUCT NAME	PART NUMBER	UNIT PRICE
--------------	-------------	------------

### LIGHTING SYSTEMS

#### LIGHTRONICS

Lighting System in a Box		
with TL112 console	LB12	\$ 1,016.00
