

CONNECTORS, CABLES AND LAMPS COME IN A WIDE VARIETY OF CAPACITIES, SIZES AND WATTAGES. MANY OF THE POPULAR ITEMS ARE LISTED HERE. IF YOU DON'T SEE A SPECIFIC CONNECTOR OR HAVE A UNIQUE LAMP YOU JUST CAN'T FIND ANYWHERE, GIVE US A CALL. WE CAN HELP YOU LOCATE WHAT YOU NEED. **THE BULB SHAPE AND BASE GUIDE CAN BE FOUND ON PAGE 11.**

CONNECTORS AND CABLES

PRODUCT NAME	PART NUMBER	UNIT PRICE
--------------	-------------	------------

20A PIN CONNECTORS (2P&G) (GP)

PINTECH

Pressure Plate

male	GPMA20PP	5.50
female	GPFA20PP	5.50

20A TWIST-LOCK (GTL)

L5-20

male (ground pin-in)	2311	\$ 8.75
female (ground pin-in)	2313	11.75

Old style

male (ground pin-out)	9965C	12.90
female (ground pin-out)	7314C	20.20

15A EDISON (PARALLEL BLADE U-GROUND) HOUSEHOLD TYPE (GR)

5-15 male	5266C	\$ 5.40
-----------	-------	---------

5-15 female	5269C	8.10
-------------	-------	------

5-15 Lex-Loc

female	X515C	8.10
--------	-------	------

male	X515P	5.40
------	-------	------

Traditional connectors use screw terminals. Over time, these connections come loose. Lex-Loc connectors use cage clamp terminals, which use spring pressure, instead of screw terminals. The spring delivers a pre-determined amount of pressure and automatically adjusts to shifting strands.

YOUR GUIDE TO CONNECTORS

Which connector do you need? Use our guide below, or contact us at product@vls.com. We can help determine the right connector for your fixture.

Stage Pin Also known as 2P&G, GP or Pin Connectors, this type is the most common wiring device used in the entertainment lighting industry. If you need a connector for your fixture in the theatre, most likely, you will need this type.

Edison This connector is also referred to as U-Ground or GR. This is the most common wiring device of all (being that it is used in every home and business in America). A NEMA type, it has applications in all areas of the electrical industry.

Twist-Lock Also called NEMA Locking, L5-20 and GTL, the prongs on these connectors are curved. As the name implies, once plugged together, it is twisted to lock the connector and prevent it from being unplugged. It is consistent with standards set forth by the National Electrical Manufacturers' Association (NEMA).

Cam-Type Used mostly by touring rigs and other events where large amounts of power are needed temporarily, Cam-Type connectors provide a quick and easy weathertight connection for feeder cable and power distribution.

ELECTRICAL SUPPLIES AND LAMPS

STAGE PIN EXTENSIONS (2P&G, 12/3 SOW-A)

5' length	5GPEXT	\$ 23.45
10' length	10GPEXT	30.70
25' length	25GPEXT	52.45

Black unwaxed.		
300'	TIELINE300	\$ 14.00
3000'	TIELINE3000	113.00

DIFFERENT USES FOR DIFFERENT PINS

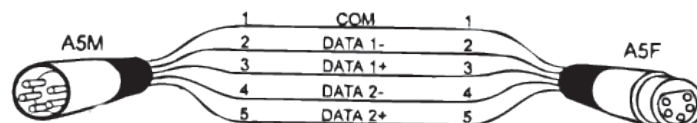

THREE-PIN This connector is generally used for headsets and other analog connections. You can find them on some smaller packs, such as the Lighttronics LPX and Leviton MPX. Strobe connections are frequent users of three-pin cable.

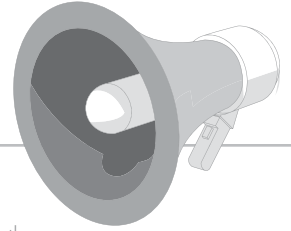

FOUR-PIN Not as common as its three- or five-pin siblings, the four-pin is mostly used in color scrollers.

FIVE-PIN You will find the five-pin mostly on higher end consoles and automated fixtures, where the signal is DMX-512. A wiring diagram is shown below.

YOU SAID

Scotty M. Everyone greets me with a smile when I walk into your office, even if the weather isn't too good. This is what I like when dealing with Vincent Lighting.

TAPE

PRODUCT NAME	PART NUMBER	UNIT PRICE
GAFFER TAPE		
1" x 55 yards ➔ Specify black or white.	PG1XXX	\$ 9.40

QUICK TIP

DETERMINE THE TYPE OF LAMP YOU NEED

The best way to determine your lamp type is to find the 3-letter ANSI code at the base of the lamp. However, sometimes the code has worn off or is missing.

Most fixture manufacturers post their data sheets online, which will tell you what lamps they require. To assist you, we provide links to our manufacturers' sites. Log onto www.vincentlighting.com.

If you don't know what type of fixture you have, e-mail a picture of it to our Product Department at product@vls.com. We will be happy to help you figure it out.

You can also call us. To help us identify the lamp, we will ask whether it screws into a socket or has pins, the length of the lamp from the tip to the end of the base and the type of base (see page 11 for diagrams).
